Summary: HMS Belfast was the largest British cruiser of the Second World War and saw distinguished service throughout the conflict, including playing a major part in the destruction of the German battlecruiser Scharnhorst. Today she is preserved as an historic monument on the River Thames in London.

This volume features: Full description of the ship and her weapons, including appearance changes and the postwar reconstruction. Pictorial section emphasising close-up and on-board photographs. Action painting and exploded diagram showing the ship's interior on the front of the jacket and a large-scales fold-out plan on the reverse. More than 300 perspective and three-view drawings, with in depth descriptive keys of every detail of the ship. A complete anatomy of the ship in words, photographs and drawings.
